QUALITY POLICY STATEMENT

Fechon Engineering & Construction Limited is committed to providing excellent Oil & Gas Equipment Procurement/Supply/Installation, Civil/Mechanical Construction Works, Electrical/Instrumentation, Metal Fabrication, Pipelines/Flowlines and Process Piping Works and Valve Maintenance and Repair Services in order to meet the needs and expectations of the customer in all aspects of quality delivery, service cost, as well as statutory and regulatory requirements.

Fechon Engineering & Construction Limited has established a documented management system developed in accordance with international Organization for Standardization (ISO 9001:2015), applicable statutory and regulatory requirements, and laid down organizational objectives. Our services and products are provided in accordance with the acceptable standards and customer specific requirements.

This Quality Policy is implemented based on the principle of customer satisfaction, proper planning, assignment of responsibilities to people at relevant function, levels and provision of resources required to execute function, objective reporting, feedback and independent verification output.

Our Quality Management System is supported at all management and relevant function levels and every personnel is required to adhere strictly to the provisions of the Quality Management System and other relevant standards. In furtherance to the above contents, top management ensures that continuous improvement measures are implemented to sustain our products and services meeting the required standards at all times.

This Quality policy is communicated to all personnel within the company and other relevant interested parties. Top management ensures that the quality management system requirements and documentations are regularly reviewed for adequacy and suitability.

Nathaniel Otie
Managing Director
